Was ist ‚Leben‘? Zur metaphorischen Rahmung eines grundlegenden
biologischen Konzepts in der Systembiologie 87

Bettina Bock von Wülfigen:

Das Genom als Text: Die Schriftmetapher revisited 117

The editors would like to thank all of their *metaphorik.de* colleagues for their patience and support. A particular thankyou goes to Dietmar Osthus and his Essen team, where Anna Billker has been helpful in providing the nitty-gritty layout details for this special volume. Without additional help and expertise from both Judith Visser (Bochum) and Lisa Rosprim (Saarbrücken) though, the finalizing of the printed version would still not have come about. Therefore our heartfelt thankyou extends to them.

Anke Beger, Olaf Jäkel, Martin Döring (Flensburg & Hamburg)
